Birth Order Q3 2008

Annual birth, death and marriage rates per 1,000 population

Average age at maternity Q3 2008

Introduction

This report has been prepared by the Central Statistics Office for the Minister for Health and Children in accordance with the provisions of Section 2 of the Vital Statistics and Births, Deaths and Marriages Registration Act, 1952 and Section 73 of the Civil Registration Act 2004.

Births

There were 18,792 births registered in quarter 3 of 2008, 9,629 males and 9,163 females, an increase of 238 on the quarter 3 figure of 2007. The quarter 3 2008 total is 36% higher than in 1999 when 13,840 babies were registered. *See tables 1 and 3.*

This represents an annual birth rate of 17.0 per 1,000 of the population, 0.1 below the rate recorded in quarter 3 of 2007. This rate is 2.2 per 1,000 population higher than in 1999. *See table 2.*

Birth order

A total of 7,896 births (42.2%) were to first time mothers in quarter 3 of 2008. This compares to 5,635 (40.9%) first births registered in quarter 3 1999. Just under one third of all births (32.0% or 5,983) were to second time mothers. *See table 4.*

Age of mothers

The average age of mothers for births registered in quarter 3 2008 was 31.1 years, the same as the corresponding figure in quarter 3 2007, and 1.1 years more than in quarter 3 1999. The average age of mothers having their first child in quarter 3 2008 was 28.8 years. *See tables 1 and 7.*

Births outside marriage

There were 6,226 births registered as outside marriage in quarter 3 of 2008. This accounted for 33.1% of all births in quarter 3 of 2008. This compares to 32.4% of births registered as outside marriage in quarter 3 2007. The highest percentage of births outside marriage occurred in Cork City at 49%, while the lowest percentage was in Roscommon at 19%. In quarter 3 1999, 4,323 births were registered outside marriage or 31.2% of all births. *See table 6.*

Deaths

There were 6,829 deaths registered in quarter 3 2008, 3,534 males and 3,295 females. This represents an annual death rate of 6.2 per 1,000 population. *See tables 1 and 9.*

Age at death

There were 73 infant deaths registered in quarter 3 2008 giving an infant mortality rate of 3.9 deaths per 1,000 live births. Neonatal deaths are deaths of infants at ages under 4 weeks. There were 52 neonatal deaths registered in quarter 3 2008, a neonatal mortality rate of 2.8 deaths per 1,000 live births. *See tables 1 and 2.*

Infant and neonatal mortality rates per 1,000 live births

There were 5,211 deaths of persons aged 65 and over registered in quarter 3 2008. This represents an annual death rate of 43.3 per 1,000 population aged 65 and over. *See tables 1 and 2.*

Cause of death

- **Diseases of the Circulatory System:**

Diseases of the Circulatory System accounted for 2,348 deaths, or an annual rate of 2.1 per 1,000 population. Of these, 1,256 were due to Ischaemic Heart Disease and 476 to Cerebrovascular Disease. *See table 11.*

- **Malignant Neoplasms:**

There were 2,105 deaths from malignant neoplasms. This is equivalent to an annual rate of 1.9 per 1,000 population. *See table 11.*

- **Diseases of the Respiratory System:**

Deaths from pneumonia numbered 246; chronic lower respiratory disease accounted for 274 deaths and 171 deaths resulted from other respiratory diseases. *See table 11.*

Death rates for ages 65 & over per 1,000 relevant population

Marriages

The number of marriages registered during the quarter was 8,765 equivalent to an annual marriage rate of 7.9 per 1,000 population, 0.2 below the corresponding quarter of 2007. The quarter 3 2008 total is just over 19% higher than in quarter 3 1999 when 7,342 marriages were registered. *See tables 1 and 2.*

Population

The estimated population in April 2008 was 4,422,100.

Methodology

All figures in this report are classified by quarter of registration. Delay in the registration of some births, deaths and marriages result in them being included in a later period in these quarterly reports.

Changes in methodology

The extension of the Limerick City boundary, which came into operation on 1st March 2008, has been taken into account in the compilation of the statistics from the second quarter of 2008. As a result, data for Limerick City and County are not directly comparable with any quarter prior to the Second Quarter 2008.

This publication continues with the 3 major changes in the methods by which mortality statistics are compiled. These changes were introduced in the Vital Statistics First Quarter 2007 publication.

- 1) Underlying Cause of Death is classified according to International Classification of Diseases, Version 10 (ICD10) instead of to International Classification of Diseases, Version 9 (ICD9).
- 2) Deaths where there was not an inquest have been coded using the automated coding system developed by the U.S National Centre for Health Statistics (NCHS). Previously the Underlying Cause of Death was chosen manually for all deaths.
- 3) All deaths registered in the Quarter have been included in the statistics, in some cases with a provisional cause of death. Previously the practice was not to include deaths in the quarterly statistics until the cause of death had been definitely established.

Principal causes of death Q3 2008

Because of these changes, caution should be taken in directly comparing these mortality statistics with those of previous quarters. Many countries have found that moving to ICD10 does affect certain specific categories of causes of death. In particular, a significant drop in the number of deaths attributed to pneumonia and bronchopneumonia has been observed in some countries after moving to ICD10. These deaths were instead assigned to other conditions included on the death certificate.

The effect of the third change above has been to increase the number of deaths in our statistics as compared with previous years. Statistics for deaths due to external causes are particularly affected by this change. The previous method meant that some deaths were included in a later quarter of the year from when they had been registered, because of the delay involved in establishing a definite cause of death.

¹ First births divided by the total number of live births (excluding those with unstated parity), multiplied by 100.² Infant mortality is the number of infant deaths per 1,000 live births.³ Neonatal mortality is the number of neonatal (infants aged under 4 weeks) deaths per 1,000 live births.

South-West	10	3.9	9	3.5

Infant mortality rates: Deaths of infants under one year per 1,000 live births, classified by area of residence of mother.

Neonatal mortality rates: Deaths of infants under 28 days per 1,000 live births, classified by area of residence of mother.

Infant and neonatal mortality rates in some areas, based on small numbers are subject to considerable fluctuation and caution should be exercised in their interpretation.

Appendix

Glossary of terms

NUTS III Regional Authority areas

Border, Midland, West, Dublin, Mid-East, Mid-West, South-East, South-West

Border: Cavan, Donegal, Leitrim, Louth, Monaghan, Sligo.

Midland: Laois, Longford, Offaly, Westmeath.

West: Galway City, Galway County, Mayo, Roscommon.

Dublin: Dublin City, South Dublin, Fingal, Dun Laoghaire-Rathdown.

Mid-East: Kildare, Meath, Wicklow.

Mid-West: Clare, Limerick City, Limerick County, North Tipperary.

South-East: Carlow, Kilkenny, South Tipperary, Waterford City, Waterford County, Wexford.

South-West: Cork City, Cork County, Kerry.
